# Smart home. Smart living.

With PowerView® Motorization from Hunter Douglas, the world's most beautiful shutters are now the most intelligent. This innovative wireless system lets you tilt your Hunter Douglas shutters according to the schedules you set. Perfect lighting, energy efficiency, everyday convenience—it's all delivered automatically with PowerView.

Contact your Hunter Douglas dealer for shutter styles and configurations available with PowerView Motorization.

# Technology. At your service.

## **Automated Living**

With the PowerView® App on your smart device, you can quickly create customized Scenes that control all the shutters in your home, operating individually or in any combination you desire. Then, just schedule those Scenes to automatically tilt your shutters' louvers to your preferred positions.

## **Energy Efficiency**

Use PowerView® Motorization to tilt your shutters' louvers according to the sun's daily patterns. Having your louvers positioned just right can reduce solar heat gain in the summer and heat loss in the winter, and could help lower your energy bills.

## **Secure**

Adjust your shutters for added security while you're away via the RemoteConnect™ feature on your smartphone or tablet.

## **Battery Powered**

Shutters with PowerView are battery powered, so they're easy to install, operate and maintain. The battery pack is hidden in the top or bottom rails, so there's nothing to mar the beauty of your shutters.

## **Child Friendly**

Simple cord-free operation is aesthetically pleasing and safer for homes with children and pets.

# Elevate the Control of Your Shutters.

Add PowerView® Motorization to your shutters for a whole new level of convenience and precise control.

- PowerView Motorization is perfect for hands-free louver operation, especially for hard-to-reach windows.
- On shutters with a divider rail or split tilt, each louver section operates individually.
- Exclusive override feature allows manual louver operation without engaging the motor. The motorized function must be used for tight louver closure.
- Operate multiple louver sections horizontally across panels with a single motor and coupler for a cost-efficient design.

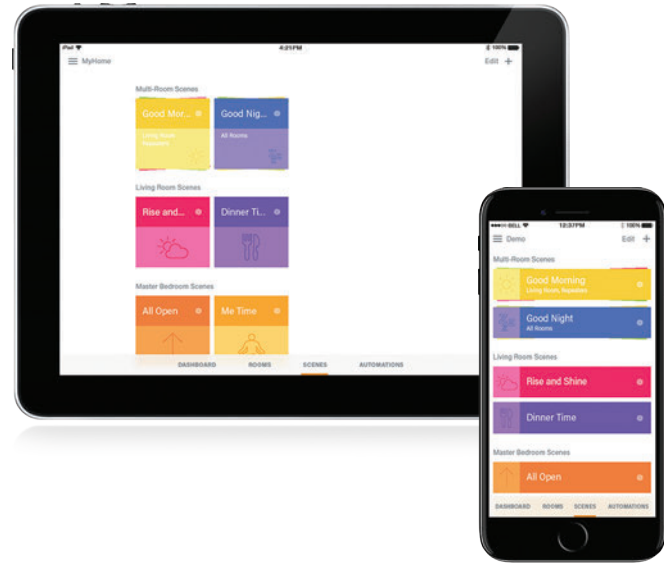

Manual operation will not damage the motor.

Panel coupler joining PowerView functionality across panels.

# Meet the PowerView® Family.

## PowerView® App

Customize your collection of Rooms and Scenes with the App, then use the Automations feature to operate them whether you're home or away. It's designed for compatibility with Apple® iOS and Android™ tablets and mobile devices.

Apple is a trademark of Apple Inc., registered in the U.S. and other countries.  
Android is a trademark of Google Inc.

### **Pebble® and Surface Remote**

The stylish and colorful handheld Pebble Remote or the wall-mounted Surface Remote puts direct adjustment at your fingertips. Operate individual or groups of shutters with the push of a button.

### **Pebble and Surface Scene Controller**

When your tablet or smartphone isn't handy, the Scene Controller works seamlessly with the PowerView® Hub and App to trigger the Scenes you've created, adding even more convenient control.

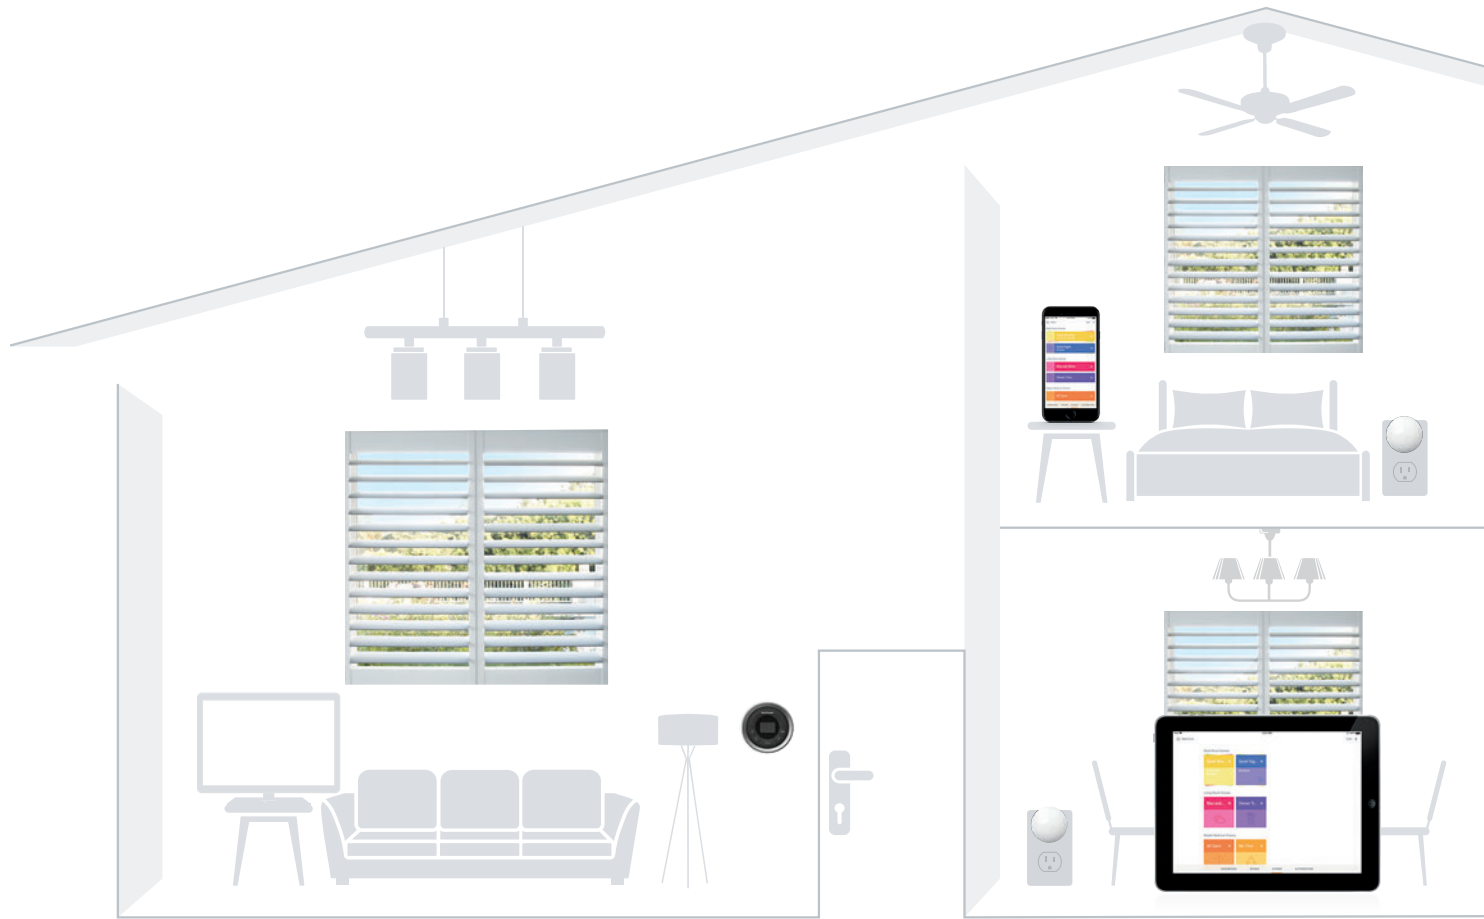

### **PowerView® Hub**

Our elegantly designed Hub connects wirelessly to your home WiFi network. It's the central point of control for all your home's PowerView shutters, storing your settings and activating your Scenes.

### **PowerView® Repeater**

The Repeater is a small signal enhancer that discreetly plugs into almost any outlet to extend signal range and carry commands throughout your home. It also provides customized lighting day and night via its illumination feature.

# Smart connections beyond the window.

Today's connected home is more advanced, and easier to control, than ever before. With PowerView® Motorization, your home's shutters are part of this convenient technology, delivering the connected lifestyle you demand—right from the smart devices you use every day.

Please be sure to visit the PowerView® Compatibility page at [hunterdouglas.com](http://hunterdouglas.com) for the latest information on compatible systems and devices.

The PowerView® App is available on Apple® iOS and Android™ mobile devices, and requires the PowerView® Hub for operation.
